DETAILED ACTION

1. Applicants' response to the restriction/election requirements with traverse filed on 6/11/04 is acknowledged. The traversal is on the ground that all the claims are read on the embodiment shown in Fig. 2A. In view of the reconsideration, the restriction/election requirements are withdrawn. The following is a detailed office action of claims 1-23.

Drawings

2. Figures 1A-1C should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because:

- (i) the first sentence is a repeated information given in the title.
- (ii) it uses words which can be implied, i.e., "comprises", "In accordance with one embodiment".

Correction is required. See MPEP § 608.01(b).

Claim Objections

4. Claims 6, 17 and 23 are objected to because of the following informalities:

In claim 6, lines 2-3, "a reset signal" should be changed to -- a second reset signal --, see line 2 of claim 10.

line 12, "a reset signal" should be changed to -- a first reset signal --.

line 14, "an evaluate signal" should be changed to -- another evaluate signal -- to avoid potential antecedent basis problem, see line 5.

line 17, "said evaluate signal" should be changed to -- said another evaluate signal -- to avoid potential antecedent basis problem, see line 7.

line 19, "said evaluate signal" should be changed to -- said another evaluate signal --.

In claim 17, line 1, "15" should be changed to -- 16 -- since there is no "evaluate signal" in claim 15.

In claim 23, line 1, "said first and said second input signals" should be changed to -- said first and said second signals -- for consistency, see line 3 of claim 16.

Appropriate correction is required.

Allowable Subject Matter

5. Claims 1-23 are allowed.

Claims 1-5 are allowed because the prior art of record fails to disclose or suggest the inclusion of first and second reset terminals in the first and second delay lines, respectively, in addition to a speed comparison logic module for comparing an evaluate signal with one of the signals output from the first and second delay lines as recited in claim 1. The inclusion of these elements define patentability over the prior art of record because they define a distinguished structure of the circuit which allows the option of preventing from propagating the signals in the first or second delay lines which is not taught by the art of record, alone or in combination.

Claims 6-23 are allowed for the same reasons noted in claim 1.

Conclusion

6. This application is in condition for allowance except for the above formal matters

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
